

VHA Policy Says: Free Medical IDs for Veterans

A Medical ID is critical for veterans who have chronic conditions including **heart conditions, hypertension, diabetes, PTSD, dementia, food/drug allergies** or suffer from injuries including **embedded metal fragments**.

The Department of Veterans Affairs issued a directive stating, **“It is VHA policy that ID bracelets and pendants must be available, upon appropriate request by Department of Veterans Affairs clinicians through Prosthetics Service, for veteran patients whose pertinent medical information would be valuable to emergency medical care providers.”**

For the VA Healthcare Professional

American Medical ID has a contract, **V797P-2296D**, with the Federal Supply Schedule to make customized medical IDs available free of charge to veterans. Here's how to order a medical ID for your patient:

- Any VA clinician (Physician, PA or NP) or other approved healthcare provider may qualify veteran for a medical ID.
- Clinician submits electronic consult to the Prosthetics Department including a) the ID style (which bracelet or necklace), b) size c) engraving details and d) veteran's name and shipping address.
- The Purchasing Agent selects and communicates directly with American Medical ID for payment via secure fax line **713-695-7358**.
